

Ecological Organic Agriculture Initiative in Africa

*Key achievements, lessons learnt and
future prospects of EOA Initiative*

*Venancia Wambua
EOA-I in Africa Project Manager*

Overview of the Presentation

- ✓ EOA-I under Swiss Agency for Cooperation & Development (SDC) in 8 countries of Kenya, Tanzania, Uganda, Ethiopia, Mali, Nigeria, Benin and Senegal.
- ✓ The presentation is based on Results of External evaluation of the Project done end of 2017 by independent consultants
- ✓ It looks at achievements, challenges, lessons learnt and future prospects of the Project based on interventions done from 2013 to 2018 (5 years)

Overview

➤ **Lead Coordinating Agencies**

- Biovision Africa Trust for SDC contribution;
- PELUM Kenya for SSNC contribution

✓ **Phase I:** 2014-2018 (SDC)

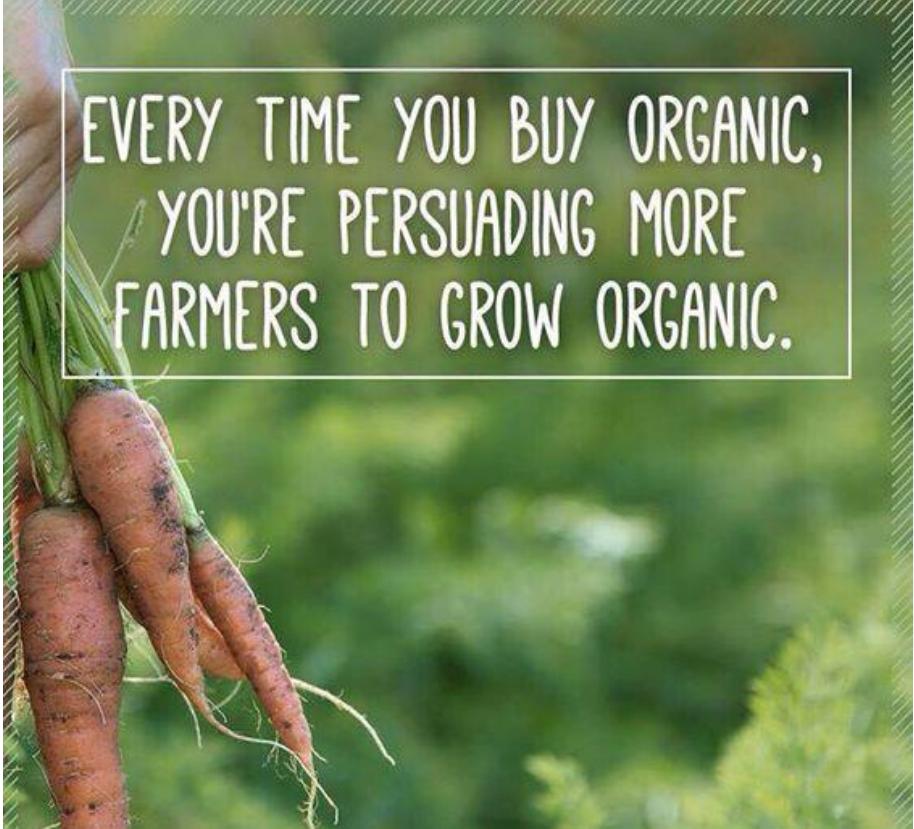

✓ **Phase II:** 2019-2023 (SDC)

✓ **Funding:**

- Swiss Agency for Development Cooperation (SDC) ;
- Swedish Society for Nature Conservation (SSNC) and Africa Union (AU)

✓ **Beneficiaries:**

- Smallholder farmers across Africa

EVERY TIME YOU BUY ORGANIC,
YOU'RE PERSUADING MORE
FARMERS TO GROW ORGANIC.

Strategic Focus

MISSION

VISION

Resilient and vibrant Ecological Organic Agricultural systems for enhanced food and nutrient security, and sustainable development in Africa.

To scale up ecologically and organically sound strategies and practices through institutional capacity development, scientific innovations, market participation, public policies and programs, outreach and communication, efficient coordination, networking and partnerships in Africa.

GOAL

To mainstream Ecological Organic Agriculture into national agricultural production systems by 2025 in order to improve agricultural productivity, food security, access to markets and sustainable development in Africa.

Strategic 6 Pillars of Implementation

Research, Training and Extension

This is responsible for understanding research and training gaps within the ecological organic agriculture value chains and undertaking appropriate activities.

Value Chain and Market Development:

This aims to stimulate development of sustainable markets and increase trade in traditional and high value agricultural produce both at domestic and export levels.

Policy and Programme Development

This supports the development and implementation of enabling policies and programs for EOA.

Institutional Capacity Development

This supports equipping of professionals with skills and competences to facilitate community-based innovation and change processes geared towards establishing, developing and supporting EOA in Africa.

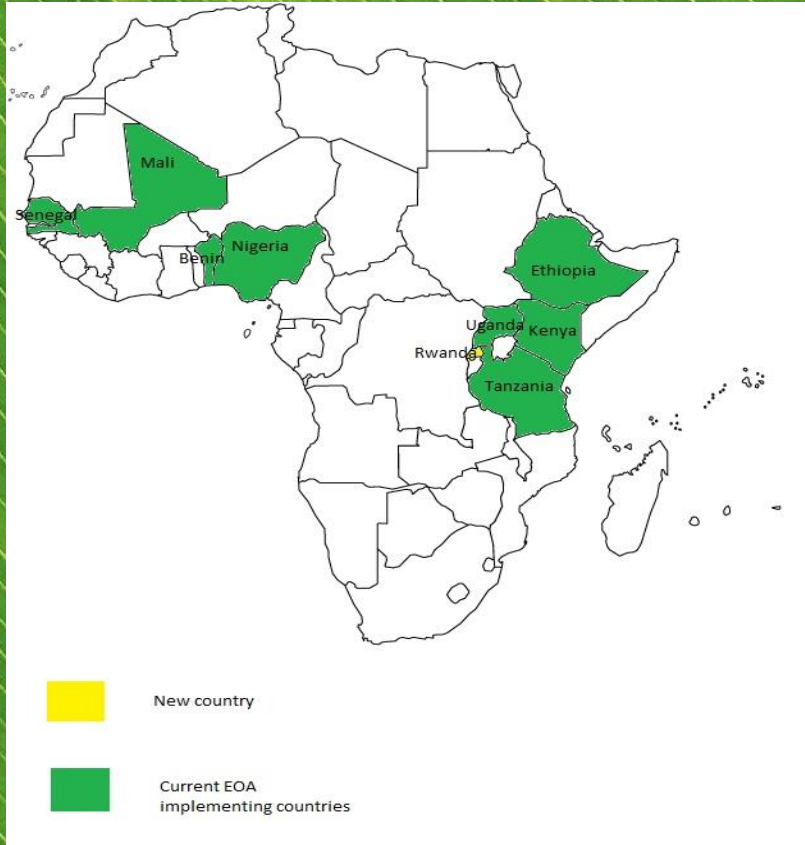

Information and Communication

This is charged with awareness creation and strengthening EOA extension support systems.

Networking and Partnerships

This calls for engagement by relevant stakeholders including governments, farmers, civil society, private sector, and the international community. The pillar is mandated with sustaining such partnerships.

Coverage & Strategic partners

COUNTRY KEY PARTNERS

1. Kenya – Kenya Organic Agriculture Network (KOAN)
2. Senegal – National Federation For Organic Agriculture (FENAB)
3. Mali - Association des Organisations Professionnelles Paysannes (AOPP)
4. Benin - Béninoise pour la Promotion de l'Agriculture Biologique (OBEPAB)
5. Nigeria – Association of Organic Agriculture Practitioners of Nigeria (NOAN)
6. Ethiopia – Institute for Sustainable Development (ISD)
7. Uganda – National Organic Agriculture Movement of Uganda (NOGAMU)
8. Tanzania – Tanzania Organic Agriculture Movement (TOAM)

Overall, over 32 partners are involved

Key Achievements

Towards EOA-I Goal Attainment National Policies and Plans

| <i>Plans</i> | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Benin</i> | Innovation for Sustainable Agricultural Growth (2017) |
| <i>Ethiopia</i> | |
| <i>Kenya</i> | |
| <i>Mali</i> | |
| <i>Nigeria</i> | |
| <i>Senegal</i> | |
| <i>Tanzania</i> | Greening Island Initiative plan Tanzania Agricultural Sector Development Programme (ASDP II) Organic Sector Development Program (OSDP) Organic Policy Action Paper (OPAP) |
| <i>Uganda</i> | National Agriculture Sector Strategic Plan 2015/16-2019/20. |

| <i>Policies</i> | |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Benin</i> | |
| <i>Ethiopia</i> | |
| <i>Kenya</i> | Organic Agriculture Policy 2017 (5 th Draft) |
| <i>Mali</i> | |
| <i>Nigeria</i> | Organic Agriculture Act of 2017 |
| <i>Senegal</i> | National Agricultural Investment Program for Food Security and Nutrition (PNIASAN),- awaiting validation |
| <i>Tanzania</i> | |
| <i>Uganda</i> | Draft Uganda Organic Agriculture Policy. Awaits Ministry of Finance to provide a certificate of financial implication National Fertilizer Policy (NFP) 2016 |

|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nigeria | <ul style="list-style-type: none"> Tertiary education organizations like NUC, NBTE, and NRCN have been lobbied to review Curriculum to include organic agriculture. A PhD student has been facilitated to carry out research on Indigenous knowledge and Organic Agriculture characterization amongst farmers in Nigeria. |
| Uganda (2) | <ul style="list-style-type: none"> At <i>Makerere University</i>: - PhD. and Masters students are carrying out research on organic Agriculture while the undergraduates are exposed to organic Agriculture through course units. At <i>Uganda Martyrs University</i> Nkozi – there is a fully-fledged undergraduate course on organic Agriculture, have developed a Masters course in Agro Ecology, and a PhD programme in agro ecology and livelihood systems. |
| Senegal (1) | <ul style="list-style-type: none"> At <i>University of Dakar</i>, the conceptualization of Organic Agriculture Degree started in 2014. To date, 6 students across Bachelors, Masters & PhD have graduated. Currently 5 students are on attachment. |
| Tanzania (1) | <ul style="list-style-type: none"> There are ongoing Organic Agriculture Research programmes at PhD. and Masters levels at <i>Sokoine University</i>. The first 2 PhDs to graduate in 2018. Dar es Salaam University is conducting research around EOA and is also playing a front role in EOA curriculum review. |

Key Achievements

Towards EOA-I Goal Attainment- Focus on Standards and Certification

Kilimohai has been in existence since 2007. Its main purpose is to maintain a single organic standard for organic agriculture production under East African conditions. The EOA-I continued to support certification of Farmers for the Kilimo Hai Mark

Key Achievements

Towards EOA-I Goal Attainment- Focus on Standards and Certification

| Country | PGS & ICS Processes |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Benin | <ul style="list-style-type: none"> 10 facilitators undertaken through ICS & PGS 3 organic producers associations trained in ICS & PGS |
| Ethiopia | <ul style="list-style-type: none"> 78 producers sensitized on PGS and 50 vegetable farmers undergoing PGS process. |
| Kenya | <ul style="list-style-type: none"> 15 PGS certification |
| Mali | <ul style="list-style-type: none"> |
| Nigeria | <ul style="list-style-type: none"> Fifty-six (56) trained in Participatory Guarantee Syst procedure of certification. Nigeria 47 local inspectors |
| Uganda | <ul style="list-style-type: none"> 11 Local Inspectors trained in PGS 226 farmers trained in ICS |
| Senegal | <ul style="list-style-type: none"> |
| Tanzania | <ul style="list-style-type: none"> 42 PGS have been developed; 12 bear active licenses under East African Organic Products Standard. 6 ICS groups have been formed. |

EOA Reach to Households & Other Target Groups

Gender Distribution

| Gender Distribution | | |
|---------------------|------|--------|
| Country | Male | Female |
| Benin | 66% | 34% |
| Ethiopia | 80% | 20% |
| Kenya | 54% | 46% |
| Mali | 31% | 69% |
| Nigeria | 33% | 67% |
| Senegal | 67% | 33% |
| Tanzania | 55% | 45% |
| Uganda | 61% | 39% |
| Grand Total | 56% | 44% |

EOA Reach to Households & Other Target Groups

Means of Reach to the Target Group and Most Popular

INFLUENCE ON ATTITUDE

The results indicated 80% of the producers do not agree with the negative stereotype within the African context that “Organic farming is for those who cannot afford chemicals and or non-organic seeds”

| Attitudes towards EOA Practices | | | | | |
|--------------------------------------------------------------------------------------|----------------|-------|-------------|----------|-------------------|
| Statement | Strongly agree | Agree | Indifferent | Disagree | Strongly disagree |
| 1. Organic farming is for those who cannot afford chemicals and or non-organic seeds | 3% | 13% | 4% | 33% | 47% |
| 1. Non-organic farming gives more yields than organic farming | 13% | 15% | 14% | 26% | 31% |
| 1. Organic farming is only for household use not market | 1% | 6% | 10% | 44% | 38% |
| 1. Organic farming is cheaper than non-organic farming | 23% | 16% | 11% | 27% | 24% |
| 1. Demand for organic products is lower than that of non-organic products | 3% | 10% | 22% | 31% | 34% |
| 1. There is no market for organic products | 5% | 15% | 12% | 35% | 34% |

ADOPTION OF EOA PRACTICES

The intention of EOA-I in providing training and training materials as well holding forums, conferences and EOA practices and product marketing through print and electronic media is to promote greater adoption of EOA practices by producers.

EOA PRACTICES INTRODUCED TO FARMERS

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none">1) Intercropping (67%)- most adopted2) Crop rotation(66%)3) Mulching (63%)4) Incorporation of farm residue to improve soil fertility (59%)5) Use of farm yard manure6) Cover crops7) Green manure8) Compost to improve soil fertility9) Green fallow period10) Compositing farmyard manure on the farm11) Inorganic fertilizer12) Animal manure | <ol style="list-style-type: none">13) Water conservation technologies14) Correction of soil pH15) Soil conservation measure16) Crop rotation17) Ploughing in leguminous plants18) Soil testing19) Zero tillage20) Nitrogen fixing plants21) Mexican sunflower22) Push pull (11.1%)23) Liming (9.4%)24) Bio-slurry (8.4%) |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

ADOPTION OF EOA PRACTICES

Across all the 24 practices, the proportion of producers practising either of them had increased or remained the same in 2017 compared to the proportion of producers who were practising in 2013

| Practices promoted by EOA-I: farmers awareness of those practices prior and eventual adoption | | | | |
|-----------------------------------------------------------------------------------------------|-----------|----------------|---------|----------------|
| | Awareness | Practices 2013 | Trained | Practices 2017 |
| Benin | 69% | 58% | 57% | 55% |
| Ethiopia | 11% | 18% | 34% | 29% |
| Kenya | 29% | 26% | 33% | 31% |
| Mali | 46% | | | |
| Nigeria | 43% | 33% | 26% | 35% |
| Senegal | 31% | 26% | 33% | 31% |
| Tanzania | 40% | 37% | 63% | 50% |
| Uganda | 26% | 26% | 40% | 29% |
| Overall | 34% | 30% | 40% | 34% |

35% of the farmers reported to have received training on at least one of the practices promoted by EOA-I.

Certified Organic Producers through EOA-I

Overall 48% of the producers or their producer groups have been certified as organic producers. Nigeria and Benin recorded the highest percentage of 100% and 97% respectively. Mali, Tanzania and Senegal recorded low percentages of certified organic producers of 17%, 23%, and 38% respectively.

3dr Party and PGS Certification

Target Markets

Between 2013 and 2017 a drastic change in Market preference where producers shifted from Local direct markets to Marketing their products through Cooperatives

In 2017, overall 91% of certified producers were aware of organic markets. Compared to 2013 where only 30% were aware

Where farmers sold their agricultural produce in 2013 and 2017

How organic producers sell their produce
(As Individual or in Groups)

Markets

A shift of 33% from Individual to Group sales was recorded between 2013 and 2017 through EOA-I interventions

Reasons why Group sells were popular:

- Higher price
- Higher bargaining power
- More stable markets from economies of scale
- Other benefits such as social capital, peer learning, and group support

EOA Pillar Contribution to Project Outcomes

| | Percentage increased production | Percentage change Productivity yield per unit area | Food security | Nutrition | Incomes (from organic farming) increased by 10%+ | Welfare improvement (quality of life) |
|--------------|---------------------------------|----------------------------------------------------|---------------|--------------|--------------------------------------------------|---------------------------------------|
| Benin | 44% | -12% | 100% | 100.0% | 44.7% | 90% |
| Ethiopia | 95% | 50% | 100% | 96.4% | 100.0% | 74% |
| Kenya | 102% | 78% | 96% | 96.4% | 76.8% | 44% |
| Mali | 98% | 76% | 98% | 96.8% | 75.0% | 96% |
| Nigeria | 105% | -5% | 96% | 96.4% | 64.3% | 64% |
| Senegal | 57% | 7% | 96% | 92.9% | 78.6% | 79% |
| Tanzania | 17% | -16% | 87% | 83.9% | 77.4% | 75% |
| Uganda | 94% | 48% | 96% | 95.9% | 37.2% | 72% |
| TOTAL | 83% | 37% | 97% | 96.1% | 58.4% | 73% |

- Effective, efficient and strong governance and management systems, are critical requirements for successful scale up of EOA and sustainability.
- Beyond the resources, the sustainability of the uptake of EOA practices and technologies and changes at farmer level, will only be sustained by a well thought-out market system approach..
- Organic famers face serious competition from in-organic farmers and also proponents of chemical inputs.
- The “game changer” for EOA success and stability at country level is a functional CLO.
- Sourcing and harmonization of streams of funding, coordination, monitoring and evaluation is still key for impact creation and scale-up

Recommendations

- Creating Opportunities for Scaling Up through Production Market Systems
- Focusing on a Value Chain Development Approach
- Develop and Employ a Robust Monitoring & Evaluation Framework
- Motivating Funding Support Arrangements
- Employing Deliberate Efforts to Involve Women, Youth & Vulnerable Groups

Future Prospects of EOA Initiative

- More funding support to mainstream EOA structures through GIZ/BMZ Knowledge Hub Project, Global Advocacy Project by Swedish Society for Nature Conservation(SSNC) and continued support by Swiss Agency for Cooperation(SDC) through Phase 2.
- Rolling out Market System Development Approaches which embrace business development support infrastructure, value chain analysis and making markets work for the poor (M4P).

Future Prospects of EOA Initiative

- Mainstreaming of EOA into CAADP PP Biennial reporting.
- Geographical expansion and outreach through mapping out other EOA related projects across Africa for synergies and partnership building.
- Exploring of investment and funding mechanisms for EOA implementation on the continent.
- Stronger Partners in governance and coordination through continuous capacity building and rapid due diligence assessment.

Thanks!
